- Adaptability

■ EXPERIENCE

CEO & Founder · Brain Coding
2024 – Present
- Integrated AI-powered tools and prompt-driven automation into client projects.
- Used LLM prompting to streamline content creation, code generation & UX copywriting.
- Researched and applied emerging AI capabilities to business development workflows.

AI Prompt Engineering Practice · Freelance / Personal Projects
2023 – Present
- Designed structured prompt templates for technical documentation & article generation.
- Tested prompt strategies across GPT-4 and Claude.
- Built prompt-powered content pipeline for the IT Note tech blog.
- Developed prompt libraries for cybersecurity analysis and code review use cases.

■ PROJECTS

engahmed.sy – SaaS Portfolio Builder
A SaaS platform enabling users to create and publish professional portfolios through monthly subscription plans. Built with **React**, **TypeScript**, and **Node.js**; features customisable templates, live preview, and subscription billing.

tejara.braincoding.tech – E-Commerce Store Builder
A SaaS platform for launching and managing full-featured e-commerce stores. Developed with **React**, **TypeScript**, and **Node.js**; includes product catalogue management, payment integration, and a multi-tenant merchant dashboard.

AI-Augmented IT Note Blog – itnote.sy
Integrated AI prompt workflows into the editorial pipeline, improving publishing speed and content quality for the Arabic tech community.

AI Tools for E-Commerce
Applied prompt engineering for product descriptions, metadata generation, and customer support templates.
